

# Abdulhafeez Hameed

## Web Developer

From the moment I wrote my first line of code, I knew I was hooked into the world of software development. But software development has never been "just a job" for me, it's offered an engaging challenge, which leads to constant learning and improvement to create high-quality software. What started with a simple line of code has become a full-fledged passion that only gets more exciting as time goes by.

## EDUCATION

### First-degree

#### Kwara State University

08/2015 - 12/2020

Second Class Upper Division

##### Courses

- Civil Engineering

## EXPERIENCE

### E-commerce web-app (<http://buymore.netlify.app/>)

- Currently building an e-commerce full-stack web application with the MERN stack, with the following features, login/logout, add to cart, online payment, and many more. The backend API's implement all the CRUD operations on the various endpoints. It implements JSON Web Token (JWT) to pass identity of authenticated users.

### MMC-Mentorship

- Building a full-stack Mentorship web application with a team of five full-stack developers. ReactJS is the library used, and Reactstrap, AntDesign are used for the front-end implementation, which Redux is used for State Management.

### Country Details Web App (<https://countrydet.netlify.app/>)

- A go-to web application for informative details about all the countries in the world. It has a theme-changing feature for sight well-being, a quick search by name, and a region filter. ReactJS and CSS3 were utilized for the development.

### API for Country Details (<https://api-country-details.herokuapp.com/countries>)

- A restful API built to provide important information about the countries in the world, with various endpoints. Uses NodeJS (Express) and MongoDB as the database.

### Newcore Technologies Landing page (<https://newcore.netlify.app/>)

- A landing page with different sections, this application was designed in raw Javascript (no libraries), HTML, and CSS. It manipulates DOM elements and relies on event handling.

### Game of Dice (<https://pig-game-v2.netlify.app/>)

- An interesting game of dice that could be played by one or two people. It manipulates DOM elements to output the app onto an HTML element. Relies on event handling to carry out the various manipulation. Utilizes raw Javascript, HTML and CSS.
